

1. (Currently Amended) A composition comprising:
  - a) a polar solvent; and
  - b) a thickening agent in an amount sufficient to impart to the composition a viscosity of at least 1000 centipoise ~~measures measured~~ at room temperature, the thickening agent comprising a polyacrylamide,  
wherein the composition is substantially anhydrous.
2. (Original) A composition as in claim 1 further comprising a beneficial agent.
3. - 4. (Cancelled)
5. (Original) A composition as in claim 1 wherein the thickening agent comprises one or more compounds selected from the group consisting of branched or unbranched polyacrylamides and substituted polyacrylamides.
6. (Cancelled)
7. (Original) A composition as in claim 1 wherein the thickening agent is present at a level from about 0.05% to about 20% by weight of the composition.
8. (Original) A composition as in claim 1 wherein the thickening agent is present at a level from about 0.5% to about 10% by weight of the composition.
9. (Original) A composition as in claim 1 wherein the thickening agent is present at a level from about 1% to about 10% by weight of the composition.
10. (Cancelled)

11. (Original) A composition as in claim 1 having a viscosity in the range of from about 1000 to about two million centipoise.
12. (Original) A composition as in claim 1 having a viscosity in the range of from about 10,000 cps to about 1,000,000 cps.
13. (Original) A composition as in claim 1 wherein the polar solvent is a polyol.
14. (Original) A composition as in claim 1 wherein the polar solvent comprises one or more compounds selected from the group consisting of polyhydric alcohols.
15. (Original) A composition as in claim 1 wherein the polar solvent comprises one or more compounds selected from the group consisting of propylene glycol, dipropylene glycol, polyethylene glycol and glycerine.
16. (Original) A composition as in claim 1 further comprising one or more optional ingredients selected from the group consisting of alcohol co-solvents, acetone, propylene carbonates, preservatives, emollients, humectants, anti-inflammatory agents, antioxidants, insect repellents or skin cooling compounds.
17. (Original) A composition as in claim 2 wherein the beneficial agent is selected from the group consisting of drug agents, medicaments and vitamins.
18. (Original) A composition as in claim 2 wherein the beneficial agent is selected from the group consisting of erythromycin, clindomycin, cephalosporins, and derivatives or pharmaceutically acceptable salts thereof.

19. (Original) A composition as in claim 2 wherein the beneficial agent is selected from the group consisting of ascorbic acid, derivatives of ascorbic acid, retinoic acid, derivatives of retinoic acid and vitamin E.

20. (Original) A composition as in claim 1 further comprising one or more compounds selected from the group consisting of methylsalicylate and menthol.

21. (Original) A composition as in claim 1 further comprising a detergent.

22. (Currently Amended) A composition as in claim 21 wherein the detergent is selected from the group consisting of sodium cocoyl isethionate, acyl glutamate, alphaolefin sulfonates and ~~sarcosynates~~ sarcosinates.

23. (Previously Presented) A foaming cleanser composition comprising:  
a polar solvent;  
a thickening agent comprising a polyacrylamide; and  
a synthetic detergent, the composition being substantially anhydrous.

24. (Original) A foaming cleanser composition as in claim 23 further comprising a beneficial agent.

25. (Currently Amended) A foaming cleanser composition as in claim 23 wherein the detergent is selected from the group consisting of sodium cocoyl isethionate, alphaolefin sulfonates, ~~sarcosynates~~ sarcosinates and acyl glutamates.

26. (Original) A foaming cleanser as in claim 24 wherein the beneficial agent is selected from the group consisting of benzoyl peroxide and salicylic acid.

27. (Currently Amended) A composition comprising:

- a) a polar solvent; and
- b) a thickening agent in an amount sufficient to impart to the composition a viscosity of at least 1000 centipoise ~~measures measured~~ at room temperature, the thickening agent comprising a mixture of polyacrylamide, C<sub>13-14</sub> isoparaffin and Laureth 7,  
wherein the composition is substantially anhydrous.

28. (Previously Presented) A composition as in claim 27 wherein the thickening agent is present at a level from about 0.5% to about 10% by weight of the composition.

29. (Currently Amended) A composition as in claim 27 having a viscosity in the range of from about 1000 to about two million ~~centipoise~~ centipoise.

30. (Previously Presented) A composition as in claim 1 wherein the polar solvent is a polyol.

31. (Currently Amended) A composition as in claim 1 wherein the polar solvent is a ~~polyol~~ selected from the group consisting of polyhydric alcohols.

32. (Previously Presented) A composition as in claim 1 wherein the polar solvent comprises one or more compounds selected from the group consisting of propylene glycol, dipropylene glycol, polyethylene glycol and glycerine.

33. (Currently Amended) A composition as in claim 27 wherein the ~~polar solvent composition~~ comprises ~~one or more~~ one or more optional ingredients selected from the group consisting of alcohol co-solvents, acetone, propylene carbonates, preservatives, emollients, humectants, anti-inflammatory agents, antioxidants, insect repellents or skin cooling compounds.

34. (Previously Presented) A composition as in claim 27 further comprising a beneficial agent.

35. (Previously Presented) A composition as in claim 34 wherein the beneficial agent is selected from the group consisting drug agents, medicaments and vitamins.

36. (Previously Presented) A composition as in claim 34 wherein the beneficial agent is selected from the group consisting of erythromycin, clindomycin, cephalosporins, and derivatives or pharmaceutically acceptable salts thereof.

37. (Previously Presented) A composition as in claim 34 wherein the beneficial agent is selected from the group consisting of ascorbic acid, derivatives of ascorbic acid, retinoic acid, derivatives of retinoic acid and vitamin E.

38. (Previously Presented) A composition as in claim 34 wherein the beneficial agent is selected from the group consisting of methylsalicylate and menthol.

39. (Previously Presented) A composition as in claim 27 further comprising a detergent.

40. (Currently Amended) A composition as in claim 39 wherein the detergent is selected from the group consisting of sodium cocoyl isethionate, acyl glutamate, alphaolefin sulfonates and sareosynates sarcosinates.
